**Early Interventions for First Episode Psychosis**

# PSYCHOSIS

- A loss of contact with reality
- Can include:
  - Hallucinations (can involve the five senses - hearing, seeing, feeling, tasting or smelling things that no one else perceives) and/or
  - Delusions (false fixed beliefs/may include paranoia)

# PSYCHOSIS

- The first episode of psychosis
  - Generally a peak onset between 15-25 years old
  - Onset for females generally a bit later than males
  - Can derail social, academic, and vocational development
  - Very confusing and frightening time

# COORDINATED SPECIALTY CARE
